

Gamma's NEX10 & F Connector Weather-proof Boot is an IP68 rated boot that works on both NEX10 and F Connections. It typically comes pre-installed on the cable allowing it to slide up and over the connection creating a watertight seal. As part of the IP68 testing process the boot has been placed in water tanks more than 1 meter in depth for over 30 min without showing any signs of water ingress.

The NEX10 & F Connector Boot is manufactured from a highly UV resistant silicone rubber that protects and seals connections. The silicone rubber is rated to operate in extreme temperatures from -76° (F) up to well over 400° (F), (or a temperature range of -60° to 230° Celsius). The boot also protects connections against dust, fungus, corrosion and Ozone.

Installed on NEX10®

Installed on F Connector

Applications

- IP68 Rated
- Designed to perfectly match & weatherproof NEX10® and F Connectors
- Reusable and flexible enough for easy slide on/off
- Tested to withstand outdoor use
- Manufactured from highly UV resistant silicone rubber
- Protects against dust, fungus, corrosion, and Ozone
- Operates in extreme temperature range of -76° to 400° (F) or -60° to 230° (C)
